ABSTRACT

This report displays and briefly describes the set of professional competencies and other learning outcomes that comprise the objectives for elementary majors enrolled in the Indiana University competency-based teacher education program known as RELATE (Reading and Language Arts Teacher Education). This report is divided into 10 units and lists competencies and enablers for each topic, with the exception of unit one which provides an overview of the course and the content and process to be used. In conclusion, five affective goals are listed, along with the following general competencies that the students are expected to develop in addition to the unit competencies and enablers: (a) identify and correct inconsistencies between and among each step of the instructional process; (b) articulate a rationale for the decisions made at any given step of the process; and (c) abandon learned techniques and adopt, adapt, or invent new ones when circumstances warrant.

TEACHER EDUCATION FORUM

BEST COPY AVAILABLE

The *Forum Series* is basically a collection of papers dealing with all phases of teacher education including inservice training and graduate study. It is intended to be a catalyst for idea exchange and interaction among those interested in all areas of teacher education. The reading audience includes teachers, school administrators, governmental and community administrators of educational agencies, graduate students and professors. The *Forum Series* represents a wide variety of content: position papers, research or evaluation reports, commentaries, state-of-the-art analyses, reactions/critiques of published materials, case studies, bibliographies, conference or convention presentations, guidelines, innovative course/program descriptions, and scenarios are welcome. Manuscripts usually average ten to thirty double-spaced typewritten pages; two copies are required. Bibliographical procedures may follow any accepted style; however, all footnotes should be prepared in a consistent fashion. Manuscripts should be submitted to Richard A. Earle, editor. Editorial decisions are made as soon as possible; accepted papers usually appear in print within two to four months.

Introduction

The following pages display the set of professional competencies and other learning outcomes which comprise the objectives for elementary majors enrolled in the Indiana University competency-based teacher education program known as RELATE (Reading and Language Arts Teacher Education).

This list, which superseded earlier documents, represents the current thinking of the developers, but is subject to further revision. It is to be regarded as a working paper. Suggestions for revisions would be warmly welcomed.

The next page contains a schematic representation outlining the various units of the RELATE curriculum and illustrating the manner in which content and process components are interwoven with the units. The diagram is potentially expandable, i.e., new units may be added or new content or process topics may be introduced in future.

Many of these topics are first treated in Unit I (Overview) under the heading "Perspectives for Decision Making."

The remaining pages describe each subsequent unit in some detail. For each unit a list of "competencies" is provided. These are professional behaviors which the teacher-in-training is expected to perform with some sophistication during his study in RELATE and then sharpen during his professional career. The lists of "enablers" are included and illustrate background knowledges, understandings and behaviors which enable the teacher-in-training to achieve mastery of the competencies.

Note: Throughout the RELATE materials, competencies are designated by number (e.g., IVC2, which indicates Unit IV, Competency 2). Enablers are coded in the same way (VIIIE1 is the first enabler in Unit VII). In Unit I the subdivisions are termed Perspectives and are designated as IP1, IP2, IP3, and so on.

RELATE: CONCEPTS AND ENABLERS STATEMENT--UNIT I

Unit Description	Perspectives for Decision Making	PROCESS
OVERVIEW		CONTENT
Introduction to content areas and the instructional process. Serves to motivate student to inquire into content and process of teaching.	1. <u>Nature of language.</u> Identify examples of given linguistic concepts in the linguistic environment of elementary children.	3. <u>Nature of Instructional Approaches.</u> Discriminate between instructional and non-instructional activities in the school situation. Observe instructional activities and discriminate between process and content instructional approaches.
	2. <u>Nature of Reading/Language Arts.</u> Based on initial reading and discussion, formulate a personal definition of reading and language arts. Identify examples of reading and language arts in the behaviors of elementary children.	4. <u>The Decision-Making Process.</u> Identify the components and types of decisions inherent in the RELATE Instructional Process.
		5. <u>The Teacher as an Instructional Decision Maker.</u> Identify competencies whereby the teacher can become an instructional decision maker. State, in original terms, the place of decision-making in the teacher's instructional role.

UNIT 1 - LEARNERS AND INSTRUCTIONAL DECISIONS - UNIT 11

Unit		Enablers	
Description	Competencies		
DIAGNOSING LEARNER CHARACTERISTICS Identification and organization of those learner characteristics which apply to your evolving definition of reading and language arts.	1. <u>Diagnosing Learners.</u> By examining various sources of data, deter- mine a given learner's status in each category of learner character- istics.	1. <u>Learners and Instructional Decisions.</u> Identify those instructional decisions which require information about learner characteristics.	
		2. <u>Categories of Learner Characteristics.</u> Identify and organize general categories of learner characteristics.	
		3. <u>Sources of Learner Data.</u> Identify and collect multiple sources of data, including direct observation of the learner, examination of teacher- existing records, and administration of teacher- made tests, for each general category of learner characteristics.	
		4. <u>Classification of Learner Data.</u> Classify data on given learners into useful categories for decision-making.	
		5. <u>Interpretation of Learner Data.</u> Use ele- mentary procedures for interpreting learner data.

RELATE IMPLEMENTATION MANAGEMENT

Conclusion

In addition to the unit competencies and enablers, each student is expected to develop the following general competencies and attitudes:

General Competencies:

1. Identify and correct inconsistencies between and among each step of the instructional process.
2. Articulate a rationale for the decisions made at any given step of the process.
3. Abandon learned techniques and adopt, adapt, or invent new ones when circumstances warrant.

Affective Goals:

1. Evidence positive affect toward competency-based process approaches to teacher education, RELATE coursework, elementary education, elementary pupils, reading and language arts, and the teaching profession.
2. Voluntarily engage in critical self-evaluation.
3. Accept peer and instructor evaluation constructively.
4. Evidence a voluntary level of inquiry.
5. Evidence a disposition toward flexibility and growth.
